- **Social Good (12/2021 – 06/2023)**

- Customer : Outsourcing – Sotatek
- Project goal : App cashback when you shop over 1800 e-commerce websites. Like Lazada, Tiki, Shopee, Sendo, Amazon, Ebay, Aliexpress, etc. With a refund value from 50% to 100% on every order you buy. Paid in SG tokens to App SocialGood
- Team size : 25
- Role : Android Developer
 - Integrate eKYC feature with Jumio
 - Refactor the code for sending user interaction events to support the data analysis feature for the business team
 - Develop the in-app purchase feature
 - Develop the feature to buy SG coins through Coinbase
 - Create a custom view for a circular progress bar with complex UI.
 - Publish app to Google Play Store
 - Implement CI-CD with Bitbucket Pipelines

Company : Vietnam Maritime Commercial Joint Stock Bank

Projects:

- **MConnect (06/2023 – present)**

- Customer : Outsourcing – Sotatek
- Project goal : Standardize the digital technology platform to be ready for simultaneous development of multiple modules and mini-apps within the Mconnect App ecosystem. Continue expanding, developing, and introducing new features aimed at supporting employees on their digital journey with features related to HR, news, event organization, etc.
- Team size : 10
- Role : Flutter Developer
 - Take on the HR module in the app : payslip, timetable, timelog, register absent, tax settlement,...
 - Discuss and split task with team about requirement from PO
 - Developing features related to event organization for the company's culture department
 - Develop the feature to enable or disable functionalities used in the app and change the splash screen via remote config.

Open source : Ivy Apps

- **Ivy Wallet (4/2024 – present)**

- Project goal : A money management app, a manual expense tracker that tries to replace the good old spreadsheet for managing your finances.
- Role : Contributor – Android Developer
 - Improve the interface, performance and fix logic errors for tickets reported by users
 - Fix UI responsive and calculation logic errors for app widgets
 - Implement UI tests using Paparazzi screenshot tests and migrate them to Compose Preview screenshot testing
